## Articles

- Adams, Ken—Falsework and fallacies **3**:30  
 Aggregates, Making the most of **1**:16  
 Analysis of fresh concrete **3**:37  
 Anchorages—Precast connections and end.... CP110 **12**:29  
 Appearance matters **5**:18  
 Art in architecture **1**:22  
 Arup, Sir Ove—on philosophy and design **6**:25  
 Australian 'excellence in concrete' **12**:26  
 Bar curtailment, Shear at point of **2**:30  
 Beams and columns, Design aids for **1**:29  
 Beam, Repair of a **4**:37  
 Beams, Use and cost of precast bridge **2**:14  
 Bearing failures in small reinforced nibs **10**:41  
 Boats, Ferrocement **9**:30  
 Bonds—steel fibre treatment to improve **3**:35  
 Bracket design and load factor choice **9**:39  
 Bridge beams, Use and cost of **2**:14  
 Bridge and flyover complex at Nottingham **7**:41  
 Brighton Marina, Speeding up curing at **10**:37  
 Building a bridge in a Turkish earthquake zone **2**:20  
 The case for an immersed road/rail tunnel **9**:25  
 Causes, mechanisms and control of surface voids **7**:45  
 CGLI Advanced Concrete Technology course—Teaching them why **7**:34  
 Cement-coated tape **12**:34  
 Channel Link—The case for an immersed road/rail tunnel **9**:25  
 Chimney design symposium **6**:39  
 Chimneys—vibration of by vortex shedding **12**:41  
 Chimneys and wind force coefficient **2**:33  
 Cliff, Climbing a concrete **9**:42  
 Colour variation in smooth concrete surfaces **8**:22  
 Columns, Design aids for beams and Complex prestressing and falsework for Windsor reservoir **6**:30  
 Concrete for a building of quality **10**:26  
 Concrete materials research seminar **9**:33  
 Concrete too is beautiful **7**:22  
 Concrete Society Awards 1973 **6**:45  
 A contractor's view on reinforcing steel **6**:22  
 Conversation piece **10**:31  
 Core, Future of the **12**:52  
 CP110, Limit states of impact and CP110—precast connections and end anchorages **12**:29  
 CP110—A quizzical look at **9**:22  
 CP110, Up-dating **8**:50  
 Cure for a landslip blackspot **12**:22  
 Curing at Brighton Marina, Speeding up of **10**:37  
 Delft conference on fibre-reinforced materials **12**:44  
 Design aids for beams and columns **1**:29  
 Dock (dry)—Graythorp's floating gate **8**:26  
 Durability of concrete in the UK **1**:24  
 An 'earnestness of engineers' **6**:26  
 Earthquake zone, Building a bridge in a Turkish **2**:20  
 Effect of heavy impact loads on structural members **9**:49  
 Europe—A standard approach to Evaluating modified concretes **1**:20  
 Part 1 **5**:34  
 Part 2 **6**:32  
 Falsework—facts and fallacies **3**:30  
 Falsework for Windsor Reservoir, Complex prestressing and **6**:30  
 Ferrocement boats **9**:30  
 Ferrocement schooners, Two **3**:32  
 Fibre reinforced materials, Delft conference on **12**:44  
 Fibres (steel)—treatment to improve bonds **3**:35  
 Foremen in the making **2**:17  
 Foreword from Edinburgh **3**:22  
 Forming holes in fresh concrete **11**:41  
 Foundations in the air **5**:26  
 Fresh concrete, Analysis of **3**:37  
 Fresh concrete, Forming holes in **11**:41  
 Future of the core **12**:52  
 Graythorp's floating gate **8**:26  
 Groover, Slipform **8**:35  
 Guluskur Bridge—Building a bridge in a Turkish earthquake zone **2**:20  
 Guniting—Have gun—will tunnel **8**:18  
 Headless Cross, High and deep at **9**:34  
 High and deep at Headless Cross **9**:34  
 High pressure water jets—'Working with water' **10**:22  
 High-speed water jetting **8**:27  
 Historical concrete :  
 Maintenance of an early reinforced concrete bridge **12**:36  
 Two old bridges... three ancient houses **4**:30  
 Two unusual prewar bridges **10**:25  
 How was the Convention **6**:65  
 Impact loads on structural members, Effect of heavy **9**:49  
 Impact and CP110, Limit states of **8**:37  
 Impressions of the Convention **6**:74  
 Landslip blackspot, Cure for a **12**:22  
 Large pours **11**:56  
 Limit states of impact and CP110 **8**:37  
 Load factor choice, Bracket design and **9**:39  
 Loads on structural members, Effect of heavy **9**:49  
 Loch Awe's Low Road **3**:26  
 London Bridge—Tradition transformed **4**:22  
 Maintenance of an early reinforced concrete bridge **12**:36  
 Making the most of natural aggregates **1**:16  
 Mixing made easy **2**:24  
 Modified concretes, Evaluation of :  
 Part 1 **5**:34  
 Part 2 **6**:32  
 National Building Specification—a review **10**:30  
 A new concept in sawing **11**:29  
 New ways at Nottingham **7**:41  
 Nibs, Bearing failures in small reinforced **10**:41  
 North Sea concrete, Turn of the tide for **11**:22  
 Nottingham, New ways at : **7**:41  
 Ove Arup, Sir—Philosophy and Design **6**:25  
 PCI at home **11**:34  
 Perlite-polymer concrete **7**:28  
 Photography and the engineer **11**:30  
 Pore structure and properties of materials **11**:44  
 Pours, Large **11**:56  
 Precast connections and end anchorages—CP110 **12**:29  
 Prestressed Concrete Institute Convention 1973 **11**:35  
 Prestressing and falsework for Windsor reservoir, Complex **6**:30  
 Properties of materials, Pore structure and **11**:44  
 A quizzical look at CP110 **9**:22  
 Redistribution of moments **10**:46  
 Reinforced nibs, Bearing failures in small **10**:41  
 Reinforcing steel—  
 A contractor's view **6**:22  
 Repair of a beam **4**:37  
 Research seminar, Concrete materials Reservoir—Complex prestressing and falsework for **6**:30  
 Reservoir—High and deep at Headless Cross **9**:34  
 Retaining wall, Sculptured **3**:43  
 Sandown Park, Walking and talking at **8**:30  
 Sawing—A new concept in Sculpture—  
 Art in architecture **1**:22  
 Concrete too is beautiful **7**:22  
 Sculptured retaining wall **3**:43  
 Shear at points of bar curtailment **2**:30  
 Simulating site experience **10**:34  
 Slipform groover **8**:35  
 Slipformed pavements, A total system of **4**:36  
 Speeding up curing at Brighton Marina **10**:37  
 A standard approach to Europe **1**:20  
 Steel fibre treatment to improve bonds **3**:35  
 Structural members, Effect of heavy impact loadings on **9**:49  
 Surface voids, Causes, mechanisms and control of **7**:45  
 Surfaces, colour variation in smooth concrete **8**:22  
 Survey, Durability of concrete in the UK **1**:24  
 Survey—What the people think **4**:34

Teaching them why	7:34
Three ancient houses	4:32
A total system of slipformed pavements	4:36
Training—	
Foremen in the making	2:17
Teaching them why	7:34
Turn of the tide for North Sea concrete	11:22
Two ferrocement schooners	3:32
Two old bridges	4:30
Two unusual prewar bridges	10:25
